

I am a dentist and Oral Surgeon by profession, and a graduate of Mutran School in 1992. The reason I enrolled both my daughters in the Ahliyyah School is that I strongly believe in the school's long standing philosophy which focuses on building the mental, emotional, and physical aspects of the student in addition to focusing on the intellectual and academic aspects. I waited for the launch of a parent's council for many years, as I believe that such an initiative would strengthen our partnership, as parents, with the school in a way that would benefit our daughters. I have been involved in my daughters' every day school life for the past eleven years, and have watched the school evolve during that time. It would be great if I can get closely involved in the process by participating in the upcoming council.
